## North Fifield - a very “Wet Spot” ... but apparently not in a flood zone !

The diagram and photos on the following pages tell a different story

06.10.2015

Fifield Road in 2007, heading south into Fifield Village past the  
proposed entrance to the new Phoenix Gym site

North Fifield from “Willow Creek” in the South West to the Proposed Phoenix Gym site in the North East.

The flooded area shown in the diagram is based on an event in January 2014 as shown in the photos on the following 3 pages. This is a frequently repeated state of affairs.

- 1 - The first 4 pictures show “Willow Creek” and surroundings.
- 2 - The next 5 pictures show the junction of Coningsby Lane and Fifield Road.
- 3 - 5 images show the route from the double culvert heading north round behind the old Chapel, onto the land of the “Old Cottage”, and out of their gate onto Fifield Road again.
- 4 - 5 pictures moving north from Coningsby Lane.
- 5 - Finally 5 pictures from the entrance to Manor Grove, the last 3 of which look north towards the corner and the entrance to “Longlea” nursing home. In the last 2 pictures the brick gate posts of “Longlea” can be clearly seen in the background. The proposed Phoenix site is just beyond.
